QUESTION 1

$E := 200\ GPa$ $\quad A := 4740\ mm^2$ $\quad I := 22.2 \cdot 10^6\ mm^4 = 0.0000222\ m^4$

$L_1 := 10\ m$ $\quad L_2 := 8\ m$ $\quad x_1 := 0\ m$ $\quad x_2 := 0\ m$ $\quad x_3 := 8\ m$

$A = (4.74 \cdot 10^{-3})\ m^2$ $\quad y_1 := 0\ m$ $\quad y_2 := 10\ m$ $\quad y_3 := 10\ m$

For this question, have to do this unitless on mathcad because mathcad struggles to combine these units in multiplication, keeping units in terms of kN and m

$E := 200000000$ kN/m^2 $\quad A := 4.74 \cdot 10^{-3}$ m^2 $\quad I := 0.0000222$ m^4

$L_1 := 10$ $\quad L_2 := 8$ $\quad x_1 := 0$ $\quad x_2 := 0$ $\quad x_3 := 8$ $\quad y_1 := 0$ $\quad y_2 := 10$ $\quad y_3 := 10$
